

***Innovation Without Borders:  
Integrating Research, Clinics, and Industry for the Future of Regenerative Medicine***

**Date & Time: Tuesday, 16/12/2025, 10:00 – 16:00**

**Venue: Sala Conferenze di Rovereto della Fondazione Caritro, Piazza Rosmini 5, Rovereto**

**Registration link (before 10/12/2025): <https://forms.gle/bk6rwCLUjUARBDEw5>**

The Life4Hub Workshop 2025, ***Innovation Without Borders: Integrating Research, Clinics, and Industry for the Future of Regenerative Medicine***, aims bring together research institutions, academia, clinical centers, industrial stakeholders, and public actors to co-design the next phase of Life4Hub.

The event will showcase cutting-edge developments in decellularization, 3D bioprinting, organoids, advanced diagnostics, and organ reconditioning, while fostering structured dialogue with biotech, MedTech, and pharma companies to align innovation with real-world clinical and industrial needs. Through presentations, roundtables, and networking opportunities, participants will explore strategies for technology transfer, IP valorization, start-up incubation, and shared infrastructure access. A key focus will also be on supporting young researchers, enabling cross-sector mentoring and career pathways. By bridging science, clinics, and industry, the workshop aims to position Life4Hub as a national platform for scalable, patient-centered innovation in regenerative medicine.
